

Presentations at the Community booth CAE-Forum in the exhibition area Digital Ecosystems HANNOVER MESSE 22nd to 26th April 2024

Take advantage of the increased attention through:

Presentations at the stage of CAE-Forum

Whether 'Use Case', software innovation, product information or research results, the CAE Forum Stage offers you the opportunity to present your findings to a broad audience. At major events, any additional activity is a great way to highlight and explain your skills and products.

The CAE Forum Stage turns your presentation into an event!

Panel discussions

For four years now, we have been organizing panel discussions on the CAE stage, in which experts discuss the current topics of the industry. Sponsors for the moderated discussions are just as welcome as suggestions for topics and discussion participants.

Corporate blocks

In company blocks you have the possibility to use the stage exclusively, e.g. for one hour or half a day. Whether award ceremony, presentation of your research project or presentation of your company/product, here you have the time and the possibility to do this in front of a large audience.

Further Service

The lectures and panel discussions will be moderated. Further options such as a photographer or a video recording of your event can be booked by arrangement. If required and by arrangement, we can also organise catering for you.
